

UNC SCHOOL OF MEDICINE

## Do you have experience with a specialty clinic for first-episode psychosis?

The University of North Carolina Department of Psychiatry is Conducting a Research Study **to survey attitudes about text messages, financial incentives, and other data communication means to help patients at these clinics make their appointments, take their medications, and/or avoid substances.**

**You may be eligible if you are at least 18 years old and have been:**

- a patient who received specialty care for first-episode psychosis
- a family member (including biological, adoptive, or "chosen" family) of such a patient OR
- a clinician who provided this specialty care.

**You would be asked to complete a one-time, ~45-minute survey.**

If you are eligible and you decide to participate, you would be compensated for your time with $60.

**If you are interested, please scan this QR code where you will be taken to a set of screening questions to determine eligibility.**
